EDUCATION

University College London September 2024 – September 2025
MSc Artificial Intelligence and Data Engineering, Merit London, UK

- **Relevant Coursework:** Software Development Practice, Requirements Engineering and Software Architecture, Engineering for Data Analysis, Introduction to Machine Learning, Applied Deep Learning

Queen Mary, University of London September 2021 – June 2024
BSc Computer Science, First Class Honours London, UK

- **Relevant Coursework:** Algorithms and Data Structures, Software Engineering, Object-Oriented Programming, Web Technology, Distributed Systems, Database Systems, Big Data Processing

SKILLS

- **Programming Languages**: Python, Java, Go, C#, SQL, PHP
- **Frameworks & Web Development**: JavaScript, React, Django, HTML, CSS
- **Data Science & ML/AI**: Pandas, NumPy, Matplotlib, Hadoop, Spark
- **DevOps & Cloud Tools**: Git, Docker, Kubernetes, Terraform, Ansible, BeeGFS

EXPERIENCE

AI Software Engineer Intern June 2025 – September 2025
International Federation of Red Cross and Red Crescent Societies London, UK

- Engineered and deployed Azure OpenAI-powered summarisation modules within the IFRC GO platform using Python to extract and summarise key insights from emergency reports across multiple workflows.
- Enhanced platform's capability to process large-scale unstructured data and support real-time operational learning and critical decision-making during humanitarian emergencies.
- Reduced emergency report processing time from hours to minutes by integrating Azure OpenAI LLM flows into legacy systems, accelerating decision-making speed across global operations.

Teaching Assistant September 2022 – December 2022
Queen Mary, University of London London, UK

- Guided 50+ students in understanding Computer System and Network concepts such as binary representation and assembly language.
- Enhanced student comprehension by simplifying complex computing concepts, ensuring accessibility for learners from diverse backgrounds.

PROJECTS

Distributed Data Automation (*Python, Terraform, Ansible, Spark, BeeGFS)* January 2025 – April 2025

- Provisioned a scalable distributed data processing pipeline across a 5-node cluster leveraging Terraform for infrastructure provisioning and Ansible for configuration management.
- Applied Spark's Alternating Least Squares (ALS) algorithm to perform collaborative filtering and machine learning analysis, leveraging BeeGFS for high-throughput parallel file storage.
- Deployed Prometheus and Grafana dashboards for real-time monitoring and system metrics visualisation.
- Secured cluster access using SSH keys and implemented host-based firewall rules.
- Achieved 35-hour continuous data processing with zero system downtime during load tests.

Portfolio Website *(React, JavaScript, SCSS)* September 2024 – September 2024

- Designed and launched a responsive portfolio web application using React for fast front-end development.
- Integrated JavaScript and SCSS for a dynamic UI, ensuring cross-browser compatibility and optimised performance.
- Configured continuous integration and automated CI/CD deployment using Netlify.

Reddit Sentiment Summariser *(Python, Django, HTML, CSS, JavaScript, SQL)* September 2023 – June 2024

- Developed an interactive web application for analysing Reddit content, implementing VADER for sentiment analysis and Pegasus-X for text summarisation, enabling toxicity detection across multiple subreddits.
- Automated data mining through RESTful APIs, retrieving and processing 100+ Reddit posts per day.
- Refactored a scalable Django backend, reducing API response latency by 30%.
- Secured user data with SQL-based authentication and data storage workflows, ensuring robust access control.
